

FRONT

Thank you for purchasing the new version of our flagship pedal, the Wave Cannon® MKII Superdistorter! This Cannon comes pre-loaded with balls! We've made this pedal to help you get even more terrific sounding distorted textures, from lighter drive and cranked, dirty amp crunch tones to the sound of a furry Godzilla devouring a junkyard full of broken air conditioners.

Proudly made in the USA at our small batch distortery™ in Columbia, S.C., this pedal is more than capable of overwhelming your amp with "amber waves of gain" to give you plenty of power, control, and fun - and that's even before we get to the Havoc switch.

SAMPLE SETTINGS - FLAVOR TO TASTE

musical/personal agenda				
"I don't really like pedals except that little green one from way back. Does anyone make those?"				
"I'm willing to have a ballad on our album if it helps sales."				
"We love plagues, sorcery, and ancient empires, so yes, we <u>do</u> write love songs."				
"Our galactic emperor would like to order your special ömelet. With extra ümläüts."				

IMPORTANT - if you use a power supply, use only a 9V DC center negative tip power supply, BOSS PSA or equivalent industry standard units. Unplug cable from input when not in use to save battery life. Also, our warranty only covers component failures or manufacturing defects - it does not cover misuse or abuse of the product, modifications or unofficial repair work. Thanks again for supporting our work and letting us keep on doing what we do!
