POUR OVER ENV FILTER

Thanks for purchasing the Pour Over Env Filter – a unique new take on the classic envelope filter effect. Pour Over's filter section features Frequency, Q and Drive controls, and toggle switches for sweep-up/sweep-down and filter type (low, high or band-pass). The distortion has its own dedicated toggle switch, with familiar Gain, Tone and Level controls.

DESIGNED IN CALIFORNIA, U.S.A.

Bypass Footswitch

Bypasses effect.

Jewel Indicator

Illuminates when effect is active.

Level

Controls overall distortion output level.

Distortion Switch

Turns distortion on and off.

Tone

Similar to tone control on a guitar – turn counterclockwise to decrease treble frequencies; turn clockwise for full-range tone.

Gain

Controls amount of distortion added to signal.

Freq

Controls filter frequency range.

Q

Controls filter resonant peak.

Drive

Controls amount of signal fed into filter.

Up/Down Switch

Controls frequency sweep direction.

Filter Type Switch

Selects low, high or band-pass filter type.

Input Jack

High-impedance input suitable for electric guitar, bass, acoustic guitars with pickup systems, keyboards and other instruments.

Output Jack

Low-impedance output jack connects to amp or to next effect pedal in signal chain.

DC Power Connector

Standard center-negative 9VDC jack for use with appropriate power supplies.

LED Kill Switch

Deactivates control-knob illumination.

Important Safety Instructions

- **WARNING:** To prevent damage, fire or shock hazard, do not expose the unit or its AC power to rain or moisture.
- Do not alter the AC plug of the connected power adapter
- Do not drip or splash liquids on the unit.
- No user serviceable parts inside, refer servicing to qualified personnel only.
- **WARNING:** The unit must only be connected to a safety agency certified, regulated, power source (adapter), approved for use and compliant with applicable local and national regulatory safety requirements.
 - Unplug the AC power adapter before cleaning the unit exterior. Use only a damp cloth for cleaning and then wait until the unit is completely dry before reconnecting it to power.
 - Amplifiers and loudspeaker systems, and ear/headphones (if equipped) are capable of producing very high sound pressure levels which may cause temporary or permanent hearing damage. Use care when setting and adjusting volume levels during use.
