

MILKMAN

A collaborative idea between JHS Pedals and Milkman Sound, the Milkman offers up an echo/slap delay and an independent boost for creamy country slap back and a full-fat tone booster you'll never want to turn off.

CONTROLS

LEFT SIDE - SLAP BACK DELAY

SLAP - Controls the time of the repeats. Left is faster and right is slower, up to 240ms.

MIX - Controls the volume of the repeats. Left is lower volume and right is higher volume.

REPEAT - Controls the amount of repeats. Left is fewer repeats and right is more repeats.

EQ - Controls the tone of the repeats. Left is darker repeats and right is brighter repeats.

RIGHT SIDE - BOOST

BOOST - Controls the volume of the boost. Left is lower volume and right is higher volume.

LEFT FOOTSWITCH - Bypass for the slap delay.

RIGHT FOOTSWITCH - Bypass for the boost.

INPUT - ¼" jack on the right side of the pedal.

OUTPUT - ¼" jack on the left side of the pedal.

POWER - Uses 9V DC Negative Center. Do not use more than 9V DC. Your warranty will be voided. 27mA consumption.
